GRZEGORZ MOZER

Toronto, M6G 3Y9 | +1 647 833 8068 | mozer.grzegorz@yahoo.com

Professional Summary

Senior Software Engineer with 7+ years of frontend experience leading and mentoring teams to deliver scalable, maintainable web applications. Expertise in TypeScript, Clean Architecture, reusable component design, and monorepo tooling with Nx and Turborepo, supported by experience establishing frontend standards, strengthening code review practices, and reducing technical debt. Skilled in HTML5, CSS3, SCSS, and responsive design, with a track record of collaborating across design, product, and backend teams on enterprise-grade products.

Skills

- **Languages**: TypeScript, JavaScript (ES6+), Python (Basic)
- **Frontend**: React, Next.js, RemixJS, HTML5, CSS3, SCSS, Tailwind CSS, Material UI, Responsive Design, Reusable UI Component Development, Bootstrap
- **Architecture & State**: System Design, Clean Architecture, Nx, Turborepo, Redux, Zustand, Context API, React Query, Apollo Client, React Router, TanStack Router, Software Engineering Best Practices, Scalable Application Design, Design Systems
- **Backend & Data**: Node.js, PostgreSQL, MongoDB, Prisma, GraphQL, REST APIs, Convex, Drizzle ORM
- **DevOps & Tools**: Git, GitHub Actions, Docker, Vercel, Vite, Webpack, Azure, Jira, Frontend Build Tools, Azure DevOps
- **Testing**: Vitest, Jest, React Testing Library, Cypress, Playwright
- **Leadership**: Team Mentorship, Technical Leadership, Code Reviews, Cross-functional Collaboration

Work History

Heineken (Heineken Global Shared Services) | *Senior Software Developer* **Dec 2024 - Present**

- Lead frontend architecture discussions to assess complex software systems, establish scalable application design patterns, and improve long-term maintainability using strict typing with TypeScript.
- Establish and enforce software engineering best practices for design and code reviews, improving codebase consistency and reducing technical debt.
- Champion internal initiatives to improve developer workflows, leveraging frontend build tools and CI/CD processes with GitHub Actions and Azure to support faster iteration cycles for the team.
- Collaborated with cross-functional teams to integrate software components seamlessly, translating business requirements into technical solutions.
- Mentored junior developers, conducting code reviews and pairing sessions to foster skill growth and team productivity.

Rangle.io | *Senior Software Developer* **Nov 2023 - Dec 2024**

- Led a development team in building scalable web applications, prioritizing reusable components and performance across high-traffic user flows.
- Analyzed complex technical problems to devise efficient algorithms and optimize code performance.
- Implemented robust error handling and state management solutions, minimizing system downtime and enhancing application reliability.
- Mentored junior developers through regular knowledge-sharing sessions, fostering a culture of continuous learning and technical leadership.
- Collaborated with design and product peers to integrate new features seamlessly into existing systems.

CGI | *Senior Software Developer* **Jan 2023 - Nov 2023**

- Led a team to develop scalable software, enhancing system performance by refactoring critical rendering paths and incorporating responsive design.
- Collaborated with product owners to define technical requirements for new features, ensuring alignment with user needs.
- Implemented strict code review processes and best practices, which reduced regression bugs during release cycles.
- Analyzed complex requirements to design efficient algorithms, boosting overall application responsiveness.
- Mentored junior developers, fostering a dynamic and productive team environment.

Software Developer **Aug 2021 - Jan 2023**

- Developed and maintained core web applications using React and SCSS, focusing on delivering stable and high-performance user experiences.

- Implemented automated testing strategies (Unit and Integration) utilizing tools like Jest and Cypress, increasing code coverage and accelerating release cycles.
- Analyzed system performance using profiling tools to identify and resolve bottlenecks, ensuring application efficiency.
- Collaborated with cross-functional teams (Design, Product) to deliver high-quality software solutions on schedule.
- Participated in code reviews and knowledge sharing, helping to maintain a collaborative and innovative team environment.

DCM | *Software Developer* **Dec 2018 - Aug 2021**

- Developed and maintained web applications using React, enhancing functionality and user workflows.
- Collaborated teams to streamline development processes using Jira and Git, improving delivery times and overall team efficiency.
- Optimized data processing workflows for large datasets, ensuring accuracy and speed in application performance.
- Resolved technical issues swiftly to maintain service reliability and minimize downtime for users.

Education

Uczelnia Warszawska Im. Marii Sklodowskiej-Curie **Aug 2008**
Bachelor of Science, Computer Science *Warsaw, Poland*
